

OVERALL QUALITY ANALYSIS

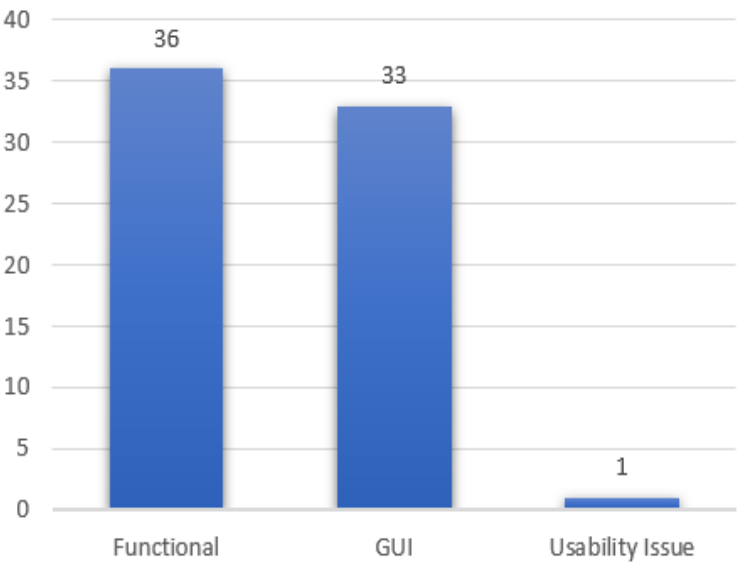

The build quality is **Low**.

The main functions of the application are booking photo sessions, sending feedback emails, viewing photo galleries. The site's functionality for viewing galleries, session information, and other information pages like Client Gallery, Philanthropy works well, but there are many defects with high and medium severity that need to be improved in order to increase the quality of the site and ensure the functioning of the main goals of the site. Defects were found when booking, calculating the cost and paying for sessions, viewing photos in the Motion gallery, searching the site, viewing the photographer's bio, working with the site menu. In addition, there are a variety of issues related to the graphical user interface: no information on the Bio & Press page, no photo on the gallery page, incomplete titles in the browser tab, incorrect favicon and misspelling errors.

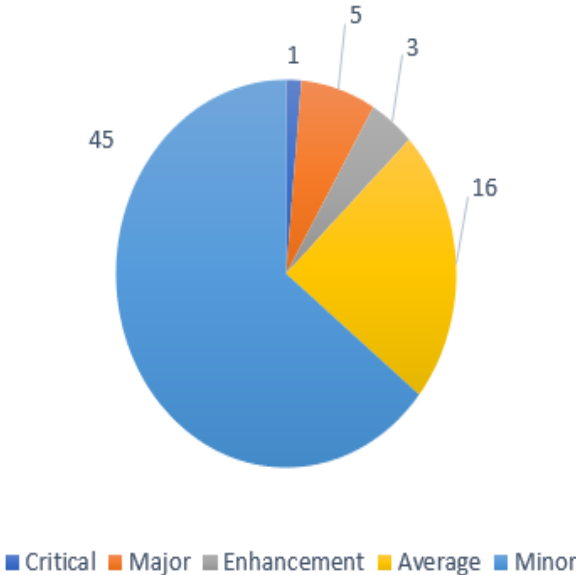

Smoke test	Unacceptable
AT	Low
Number of defects	70
Time spent	23 h

DETAILED QUALITY ANALYSIS

Chart by Error Type

Severity Chart

The issue chart by error type shows that there are 12% more functional errors than the GUI. The severity chart shows that the current build quality is low: the presence of a critical defect that blocks the main functionality of the site and a lot of major and average defects.

QUALITY BY MODULES		
Module	Quality	Comments
Work: Portrait, Lifestyle, Travel, Motion Gallery	Low	For this module, most of the defects can be attributed to functional, but there is also GUI. The main defect of this module is the absence of the Motion Gallery page (QATC-226107). Also, functional defects are related to the operation of the photo slider (QATC-226554), page switching using pagination (QATC-225470), viewing multiple photos (QATC-226464). GUI defects are related to the presence of all photos on the gallery pages (QATC-226464), the order of photos (QATC-226457).
Sessions	Low	This module contains a critical defect related to the inability to make payment for the session (QATC-226600). Another important defect is related to the calculation of the session cost (QATC-226556) and the functionality of the booking form (QATC-226657), (QATC-226603), (QATC-226601).
Connect (Bio & Press, Clients, Philanthropy, Contact)	Low	«Bio & Press» page has a major GUI defect associated with the lack of information on it (QATC-226436). «Clients» page has functional defects related to incorrect links in images (QATC-226666), as well as GUI defects related to the order of clients on the page (QATC-226662). «Philanthropy» page has GUI defects related to the absence of part of the text (QATC-226516) and the presence of errors in it (QATC-226515). «Contact» page has functional defects related to inconsistencies in the requirements for the form fields (QATC-226639), (QATC-226656), lack of footer (QATC-226430), and GUI defects (QATC-226373), (QATC-226371).
InstaOlsen	Medium	The bug on the InstaOlsen tab is related to the fact that the link to the Instagram account does not open on the next browser tab (QATC-226331).

Top issues

ID	Severity
QATC-226600	Critical
QATC-226107	Major
QATC-226323	Major
QATC-226436	Major
QATC-226556	Major
QATC-226351	Average
QATC-225252	Average
QATC-226464	Average
More...	

Testing environment

Windows 10 Pro, Google Chrome
84.0.4147.105

Recommendation

First of all, need to fix defects related to the main task of the app: booking and paying for sessions, viewing all galleries, as well as all critical, major and average defects. Also need to correct the defects of the graphical user interface for user convenience.
